

## FEATURED MEDICAL SPA

# Skin Deep Laser Med Spa

By Cindy Vandruff-Endres, Editor in Chief

Stepping into the reception area of Skin Deep Laser Med Spa gives you the wonderful feeling that you will be completely pampered and cared for in the most professional manner.

Skin Deep is nestled in the heart of historical Pasadena, California. The attention to detail throughout this Medical Spa is impeccable. In every nook you will find cozy hideaways for relaxing or preparing for treatments in a luxurious atmosphere. Consultation rooms are roomy and warm, allowing the patients to feel welcomed and unobtrusive. The staff is very friendly. They give the guests a sense of comfort and help to make the treatments inviting.

Each treatment room has its own tranquil name – making the experience engaging and allowing the patients to feel at ease, prior to and even during the most extensive treatment.

Colin Hurren

Colin Hurren, Founder and CEO of Skin Deep, modestly acknowledged his formula for success for his clinic which is, in my opinion, one to be marveled. Only one year in business and the clientele base continues to increase. They are doing exceptionally well for a new facility.

During my visit, he explained his reasons for creating the atmosphere found at Skin Deep. “We want our guests to consider this a journey along the path to healthier skin. We map out a regimen exclusively for each guest and help them achieve their goals in our extensive initial consultation. They should have realistic goals, but goals which make them feel better about themselves. This is not a place to come for a one-time visit. Our team of professionals are here to share the journey and to make the guests’ goals materialize.”

Medical Director, Dr. Saul Berger, a Board Certified Plastic Surgeon, is also an advocate of this type of treatment protocol – realistic goals and a positive outcome addressing the

individual needs of the patient. This approach is clearly demonstrated in the before and after clinical photos found in Dr. Berger’s consultation room. The caliber of results for his patients is very impressive. Patient comfort and efficacy are key with Dr. Berger. Already a successful surgeon in his own right with a thriving private practice caring for breast cancer patients and other plastics specialties, Dr. Berger completes the exceptional team at Skin Deep Laser Med Spa.

Bottom line, Skin Deep Laser Med Spa stands behind their serious services and medical grade products when treating patients. They have opted for a more clinical approach for their guests (the preferred name of their patients) who can be treated for anti-aging and skin conditions by their highly trained estheticians, nurses, and physician on staff.

For those physicians entering the Medical Spa arena, take note of this extraordinary example of a successful and reputable medical spa. Skin Deep is setting the standard of excellence and a medical spa to watch.
